

Prevent Venous Thromboembolism (VTE)

***Venous Thromboembolism (VTE)  
is one of the most common  
complications in hospitalized patients***

**Announcing the Great Canadian  
VTE Audit Day  
May 14, 2009**

By participating in the national audit day - you will be a part of a movement aimed at preventing deep vein thrombosis (DVT) and pulmonary embolism (PE) in hospital patients
